

Front Outer Cover

6.00" X 9.00"
(Flat Size: 6.00" X 9.00")

-  **Bleed Area:** 0.80" - We aim to trim this area off, but some movement can occur. Extend your design into this area to avoid white gaps that could occur due to paper movement.
-  **Quiet Area:** top: 0.25", right: 0.25", bottom: 0.25", left: 0.40"- Keep any text or important elements away from this area. This area has a safe distance to allow for any paper movement as the trimming and binding can be done further in than expected.
-  **Cover Overhang:** An area up to 0.25" larger than the body block, extending from the bleed area
-  **Cover Board Edges:** The visible 0.1" thickness of the cover board, extending from the bleed area.
-  **Inside Cover Wraparound:** The approximate 0.25" cover edge originating from the bleed area, visible on the inside covers where the glued endpapers are attached.
-  **Cover Hinge:** A 0.2" area visible between the covers and the spine's edge, extending from the bleed area.
-  **Trim Area** - Also referred as the outer edge. Matches the finished size of your project
-  **Fold Line** - Also referred as the inner edge. This is where the document will be folded or bound.

Back Outer Cover

6.00" X 9.00"
(Flat Size: 6.00" X 9.00")

-  Bleed Area: 0.80" - We aim to trim this area off, but some movement can occur. Extend your design into this area to avoid white gaps that could occur due to paper movement.
-  Quiet Area: top: 0.25", right: 0.40", bottom: 0.25", left: 0.25"- Keep any text or important elements away from this area. This area has a safe distance to allow for any paper movement as the trimming and binding can be done further in than expected.
-  Cover Overhang: An area up to 0.25" larger than the body block, extending from the bleed area
-  Cover Board Edges: The visible 0.1" thickness of the cover board, extending from the bleed area.
-  Inside Cover Wraparound: The approximate 0.25" cover edge originating from the bleed area, visible on the inside covers where the glued endpapers are attached.
-  Cover Hinge: A 0.2" area visible between the covers and the spine's edge, extending from the bleed area.
-  --- Trim Area - Also referred as the outer edge. Matches the finished size of your project
-  --- Fold Line - Also referred as the inner edge. This is where the document will be folded or bound.

Spine 0.60" X 9.00"

Body
Body Right
6.00" X 9.00"
(Flat Size: 6.00" X 9.00")

-  Bleed Area: 0.13" - We aim to trim this area off, but some movement can occur. Extend your design into this area to avoid white gaps that could occur due to paper movement.
-  Quiet Area: top: 0.25", right: 0.25", bottom: 0.25", left: 0.50"- Keep any text or important elements away from this area. This area has a safe distance to allow for any paper movement as the trimming and binding can be done further in than expected.
-  Trim Area - Also referred as the outer edge. We aim to trim this area off to the final size, but some movement can occur.
-  Fold Line - Also referred as the inner edge. This is where the document will be folded or bound.

Body
Body Left
6.00" X 9.00"
(Flat Size: 6.00" X 9.00")

Bleed Area: 0.13" - We aim to trim this area off, but some movement can occur. Extend your design into this area to avoid white gaps that could occur due to paper movement.

Quiet Area: top: 0.25", right: 0.50", bottom: 0.25", left: 0.25"- Keep any text or important elements away from this area. This area has a safe distance to allow for any paper movement as the trimming and binding can be done further in than expected.

Trim Area - Also referred as the outer edge. We aim to trim this area off to the final size, but some movement can occur.

Fold Line - Also referred as the inner edge. This is where the document will be folded or bound.

Cover Spread Outer Back

6.20" X 9.00"
(Flat Size: 13.00" X 9.00")

- Bleed Area: 0.80" - We aim to trim this area off, but some movement can occur. Extend your design into this area to avoid white gaps that could occur due to paper movement.
- Quiet Area: top: 0.25", right: 0.60", bottom: 0.25", left: 0.25"- Keep any text or important elements away from this area. This area has a safe distance to allow for any paper movement as the trimming and binding can be done further in than expected.
- Cover Overhang: An area up to 0.25" larger than the body block, extending from the bleed area
- Cover Board Edges: The visible 0.1" thickness of the cover board, extending from the bleed area.
- Inside Cover Wraparound: The approximate 0.25" cover edge originating from the bleed area, visible on the inside covers where the glued endpapers are attached.
- Cover Hinge: A 0.2" area visible between the covers and the spine's edge, extending from the bleed area.
- Trim Area - Also referred as the outer edge. Matches the finished size of your project
- Fold Line - Also referred as the inner edge. This is where the document will be folded or bound.

Spine 0.60" X 9.00"

Cover Spread Outer Front

6.20" X 9.00"
(Flat Size: 13.00" X 9.00")

- Bleed Area: 0.80" - We aim to trim this area off, but some movement can occur. Extend your design into this area to avoid white gaps that could occur due to paper movement.
- Quiet Area: top: 0.25", right: 0.25", bottom: 0.25", left: 0.60"- Keep any text or important elements away from this area. This area has a safe distance to allow for any paper movement as the trimming and binding can be done further in than expected.
- Cover Overhang: An area up to 0.25" larger than the body block, extending from the bleed area
- Cover Board Edges: The visible 0.1" thickness of the cover board, extending from the bleed area.
- Inside Cover Wraparound: The approximate 0.25" cover edge originating from the bleed area, visible on the inside covers where the glued endpapers are attached.
- Cover Hinge: A 0.2" area visible between the covers and the spine's edge, extending from the bleed area.
- Trim Area - Also referred as the outer edge. Matches the finished size of your project
- Fold Line - Also referred as the inner edge. This is where the document will be folded or bound.
